

HOSPITALITY CLEANING SERVICES INC.

July 7, 2024

To Whom it may Concern.

HACCP Canada endorses and highly recommends Carbsolve, the solution used in the Spectank cleaning system, distributed in Canada by Hospitality Cleaning Services Inc., for cleaning of high grime/grease build-up on primary food contact surfaces and equipment.

An effective Sanitation Program is the cornerstone of all HACCP Systems. Carbsolve is a non-toxic, non-corrosive, and biodegradable cleaning powder. Carbsolve, when used per the manufacturer direction and recommended dilutions, removes fat, grease, carbon, and oil without causing any damage to the parent material. The manufacturer also claims that the diluted product is environmentally friendly as it is biodegradable making it safe for standard drain disposal. Carbsolve greatly reduces or eliminates the four primary sources of contamination relevant to all HACCP Programs.

HACCP Compliancy Detering Potential Contamination Events:

Physical Contaminants – The effective removal of physical contaminants is the primary step of any successful HACCP-Based cleaning program. Carbsolve uses heat and water activation to effectively remove all physical contaminants normally associated with food production in kitchen facilities.

Chemical Contaminants – Although Carbsolve is a cleaning agent, the primary components are non-toxic and non-caustic when properly mixed per manufacturer directions. Further, the CFIA- Canadian Food Inspection Agency has issued a letter of no-objection (File #S523) for its use with primary food contact surfaces indicating that it does not leave a residue that causes harm.

Biological Contaminants – As a cleaning compound, Carbsolve is the first step in a successful Sanitation Program, clearing the way for effective use of standard sanitizing agents.

Allergenic – The primary components of Carbsolve provide no known allergenic reactions when mixed per manufacturer's directions.

HACCP Canada is proud to recognize **Carbsolve** as a superior cleaning product for contributing to broadening the scope of the Food Safety Culture in Canada.

Kind Regards,

Skye Marie, C.E.O.

HACCP Canada Foodsafety Inc.

This Letter of Endorsement is valid for two (2) years from the date of issue and is subject to review and/or revocation pending any changes to the product or its application method.
